Introduction		ix
<b>Section 1</b>	<b>CMOS Nanoelectronics. Reaching the End of the Roadmap</b>	<b>1</b>
<i>Sub-section 1.1</i>	<i>Core CMOS</i>	<i>3</i>
Chapter 1	Physical and Technological Limitations of NANOCMOS Devices to the End of the Roadmap and Beyond <i>Simon Deleonibus, Olivier Faynot, Barbara de Salvo, Thomas Ernst, Cyrille Le Royer, Thierry Poiroux and Maud Vinet</i>	5
Chapter 2	Advanced CMOS Devices on Bulk and SOI: Physics, Modeling and Characterization <i>Thierry Poiroux and Gilles Le Carval</i>	55
Chapter 3	Devices Structures and Carrier Transport Properties of Advanced CMOS using High Mobility Channels <i>Shinichi Takagi, Tsutomu Tezuka, Toshifumi Irisawa, Shu Nakaharai, Toshinori Numata, Koji Usuda, Naoharu Sugiyama, Masato Shichijo, Ryosho Nakane and Satoshi Sugahara</i>	81
Chapter 4	High-K Gate Dielectrics <i>Hei Wong, Kenji Shiraishi, Kuniyuki Kakushima, and Hiroshi Iwai</i>	105
Chapter 5	Fabrication of Source and Drain — Ultra Shallow Junction <i>Bunji Mizuno</i>	141

Chapter 6	New Interconnect Schemes: End of Copper, Optical Interconnects? <i>Suzanne Laval, Laurent Vivien, Eric Cassan, Delphine Marris-Morini and Jean-Marc Fédéli</i>	159
<b>Sub-section 1.2</b>	<b>Memory Devices</b>	185
Chapter 7	Technologies and Key Design Issues for Memory Devices <i>Kinam Kim and Gitae Jeong</i>	187
Chapter 8	FeRAM and MRAM Technologies <i>Yoshihiro Arimoto</i>	211
Chapter 9	Advanced Charge Storage Memories: From Silicon Nanocrystals to Molecular Devices <i>Barbara De Salvo and Gabriel Molas</i>	241
<b>Section 2</b>	<b>CMOS Nanoelectronics. Reaching the End of the Roadmap</b>	277
Chapter 10	Single Electron Devices and Applications <i>Jacques Gautier, Xavier Jehl, and Marc Sanquer</i>	279
Chapter 11	Electronic Properties of Organic Monolayers and Molecular Devices <i>Dominique Vuillaume</i>	299
Chapter 12	Carbon Nanotube Electronics <i>Vincent Derycke, Arianna Filoramo and Jean-Philippe Bourgoin</i>	333
Chapter 13	Spin Electronics <i>Kyung-Jin Lee and Sang Ho Lim</i>	365
Chapter 14	The Longer Term: Quantum Information Processing and Communication <i>Philippe Jorrand</i>	387
